Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE
WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR CODEBOOK NOTES FOR #35168
Survey of Public Participation in the Arts (SPPA), 2012 [United States]

- 1) Users are strongly encouraged to refer the CPS User Guide (produced by the Census Bureau), which contains additional detailed technical documentation regarding the CPS study design, sampling frame used, and response rates. Users are also encouraged to read the SPPA User Guide (produced by the Urban Institute) for information about the SPPA, including the design, dealing with missing respondent data, weights, and multi-variable analysis.
- 2) The SPPA 2012 was originally released in September 2013. This previous release has been revised to reflect changes in how the 2012 SPPA counted "interviews." Specifically, the Census revisions count "yes," "no," and "don't know" as interviews, in accordance with estimates generated from the 2008 and earlier waves of the SPPA. Alternatively, the September 2013 estimates provided by the U.S. Census Bureau had included respondents who "refused to answer" as interviews--an action that clouded comparisons with previous SPPA waves.

Many of the 2012 SPPA estimates were unaffected by these revisions. And of those that were affected, most changes to participation rates were marginal, often in the range of 1-2 tenths of a percentage point.

- 3) The SPPA provides estimates for 32 states: Alabama; California; Colorado, Connecticut; Florida; Georgia; Illinois; Iowa; Kansas; Maine; Maryland; Massachusetts; Michigan; Minnesota; Missouri; Nebraska; Nevada; New Jersey; New York; North Carolina; North Dakota; Ohio; Oregon; Pennsylvania; Rhode Island; South Carolina; South Dakota; Texas; Virginia; Washington; and Wyoming.

In addition, the SPPA can reliably supply arts participation estimates for 11 metropolitan areas: Boston-Worchester-Manchester, MA-NH; Chicago-Naperville-Michigan City, IL-IN; Dallas-Fort Worth, TX; Denver-Aurora-Boulder, CO; Detroit-Warren-Flint, MI; Los Angeles-Long Beach-Riverside, CA; Miami-Fort Lauderdale-Miami Beach, FL; New York-Newark-Bridgeport, NY-NJ-CT-PA; Philadelphia-Camden-Vineland, PA-NJ-DE-MD; San Jose-Francisco-Oakland, CA; and Washington-Baltimore-Northern Virginia, DC-MD-VA-WV.

- 4) For the full lists of industry classification codes, occupation classification codes, specific metropolitan identifiers, and countries and areas of the world, please refer to the appropriate sections of the CPS User Guide (Attachments 9-14).
- 5) For this data collection, ICPSR created the **CASEID** variable which is a unique case identifier.
- 6) The "Basic CPS Record Layout" section in the CPS User Guide (see Attachment 6) contains many **FILLER** variables and a couple **PADDING** variables with column locations. Also, only 1 **FILLER** variable was found in the data that ICPSR received, and ICPSR removed the **FILLER** variable. As a result, the column locations in any ICPSR-released data product (e.g., codebook and setup files) will have column locations that are not consistent with locations described in the CPS User Guide.

- 7) Please note that missing values and their labels for the CPS variables are not the same as the missing values and labels for variables in the SPPA Supplement.

According to the Census Bureau, the missing values and their labels for the edited CPS variables (variables with E as the second character in the variable name) are the same as those for the unedited CPS variables as listed in the “Basic CPS Record Layout” section in the CPS User Guide. ICPSR edited the missing values per Census Bureau’s suggestions. The value labels for missing values for all applicable edited and unedited CPS variables are as follows: -1 “Blank,” -2 “Don’t know,” and -3 “Refused” (see first page of Attachment 6).

Some CPS variables (e.g., those with variable names starting with “HE,” “PE,” “PR,” and “PT” and the Allocation Flags) have missing values and labels of -9 “No response,” -3 “Refused,” -2 “Don’t know,” and -1 “Not in universe.”

- 8) In the data collection deposited to ICPSR, no documentation was provided for variable **HWHHWTLN**. However, variable information for this variable is in the 2013 CPS Record Layout provided by the National Endowment for the Arts and was used for this data collection.
- 9) To improve ease of analysis, the width of the data for variables originally containing implied decimals were adjusted so that they now have explicit decimals. The following variables are: **PUERNH1C, PEERNH2, PEERNH1O, PRERNHLY, PRERNWA, PEERN, PUERN2, HWHHWGT, PWFMWGT, PWLGWGT, PWORWGT, PWSSWGT, PWVETWGT, and PWCMWPWT**.
- 10) Variable **HFINAL** contains two values with duplicate value labels. Users may manipulate the data according to their preferences. The duplicate value labels are: “Other – specify” for values 233 and 248.
- 11) **PUHRCK7** and **PUIOCK1**: These variables have value labels that appear to be truncated in the data. For the full version of these value labels, please refer to the “CPS Record Layout” section in the CPS User Guide.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
